

Company Info 1/2009

2008 revenue increased by 45 % for LTi

2008 saw major positive developments for the LTi group. The internationally active group of companies who specialises mainly in propulsion technology for automation, magnetic bearing technology, renewable energies and microsystems/sensor technology can look back to a successful year. LTi was able to increase their revenue by more than 170 mio. Euro which translates into over 45%. Renewable energy products contributed more than average to this development.

“Last year’s big success has created a good basis for the current year of 2009 which we enter in a strong position despite the turbulences on the financial markets” says managing director Dr. Wolfgang Lust about current developments and figures.
